Foiled Colour Options

* Nearest match. RAL numbers are given in good faith but are for reference only. We take no responsibility for other materials not matching our finish.

Glazing Options

Resin Bevel (BP) - No backing glass option available ▲

Each design is carefully sealed between two panes of glass for ease of cleaning. This glass will not shatter but will hold together even if broken. Each resin is obscure and the design will occasionally produce minor imperfections that are generally regarded as acceptable. The resin is glazed on the inside piece of glass facing outwards.

Bevelled Glass (DB)

Traditional handcrafted and bonded to the glass with an optically clear resin, then overlaid with lead. These timeless designs will complement that period home.

Sandblasted / Etched Glass (TD) (DB)

This handcrafted glass is now produced using modern technology and is designed to give a traditional appearance. For a more dramatic effect, this is often combined with striking glass bevels. Though generally obscure, it does leave various areas clear.

Top Tips

Clean your door about every four months with a non-abrasive cleaner to remove any grime and atmospheric deposits.

To clean your glass, use a soft cloth with soap and water. Avoid excessive pressure when cleaning leaded glass.

Lubricate locks and hardware as required using a light machine oil such as WD40. This will ensure your door continues to function smoothly and quietly.
